

React Setup Quick Guide

Basic commands to get started with React:

1. Create a new React app:

```
npx create-react-app my-app
```

2. Move into your project folder:

```
cd my-app
```

3. Start the development server:

```
npm start
```

4. Install React Router for navigation between pages:

```
npm install react-router-dom
```

5. (Optional) Install Bootstrap for styling:

```
npm install bootstrap
```

6. Import Bootstrap in your src/index.js:

```
import 'bootstrap/dist/css/bootstrap.min.css';
```
